# HARVEST THE DAYLIGHT

More light = higher yield

# ROOF WASHING

2000 m<sup>2</sup>/hour  
0.50 acres/hour

# ROOFMASTER 2in1

Roofmasters are washing the roofs of greenhouses all over the world. Why? 1% of light equals 1% of yield. The Roofmaster increases production by 1-10% per year.

Spraying coatings is an effective way to create a better greenhouse climate, improving crop quality and production. With the Roofmaster, coatings can easily be applied and removed at those times of year it suits best.

# SPRAYING COATINGS

9000 m<sup>2</sup>/hour  
2.23 acres/hour
